

J.L.E. ENTERPRISES, INC.

Attached please find our application for credit and terms on accounts.

JLE extends Net on Receipt terms to qualified customers with anticipated monthly wash volumes exceeding \$100.00. These types of accounts take time to set up depending on the response time of the references submitted.

Pre-payment accounts can be set up immediately on request. We can easily accommodate this type of an account by posting payment to your account, which results in a credit balance. Services rendered at our NE Portland Truck Wash would be invoiced to your account and statements mailed the first of each month to help customer's reconcile missing invoices. Simply mail in a payment when you felt your credit balance was getting close to -0-.

We can also set up a credit card account on demand for customers who are serviced outside our public truck wash. These accounts allows a credit limit equal to the cost of one service which is billed and mailed to the customer. The customer then calls in his/her credit card information and we are happy to transmit payment on request.

If you would like to request a "Net on Receipt" account, please complete and sign the application and return to our office. We will let you know in a week or so the status of your account. If you would like to open up a pre-paid or credit card account, simply complete the first page (excluding trade references) and write "Pre-paid Account"/"Credit Card Account" across the bottom and return it to us. We will set up an account with the appropriate credit balance which you can make payments to.

If you have any questions, please feel free to give me a call.
